SUMMARY

Software Engineer experienced in Python, machine learning, and NLP. Skilled in building data-driven applications using scikit-learn and pandas, and deploying code via Streamlit.

SKILLS

- * Programming languages: Python, SQL, JavaScript
- * Data analysis: pandas, NumPy, Matplotlib
- * Machine learning: scikit-learn, TensorFlow
- * NLP: NLTK, spaCy
- * Web app frameworks: Streamlit, Flask
- * Version control: Git & GitHub

EXPERIENCE

Machine Learning Intern | ABC Tech Solutions | Jun 2024 - Aug 2024

- * Developed an NLP pipeline using spaCy to preprocess and extract named entities from legal documents.
- * Built a classifier with scikit-learn that achieved 92% accuracy on document categorization.
- * Deployed prototype via a Streamlit app for internal demo.

Intern | XYZ Data Analytics | Jan 2023 - May 2023

- * Analyzed customer behavior data with pandas and created visualizations in Matplotlib.
- * Automated monthly reports using Python and scheduled scripts.

EDUCATION

B.Tech in Computer Science | XYZ Engineering College | 2021 - Present

Relevant coursework: Machine Learning, NLP, Data Structures

PROJECTS

- * Resume Scanner Web App: Built using Python, TF-IDF, cosine similarity, and Streamlit to match resumes to job descriptions.
- * Sentiment Analyzer: Used NLTK to analyze customer feedback and visualize sentiment distribution.
